

1. To install, Unzip the downloaded package to a new folder, Do this by right clicking and select Unzip or Extract Files.
2. Run Setup.exe. If your anti-virus detects a virus it is a false positive, you will need to turn the anti-virus off during install. If you need assistance, email [pfSupport@rogers.com](mailto:pfSupport@rogers.com) and we can arrange to remote in and install for you or answer any questions.
3. Set the icon to run as administrator. Do this by right clicking on the icon, select Properties, the compatibility tab the check the run as administrator box.

4. Windows 7 Example
5. Add Pocketfleet Diagnostic Tool.exe to your antivirus whitelist. Please consult your AV documentation for this process. The files should be located in C:\Program Files (x86)\PocketfleetDS\PFDT-Tool\

If you have issues installing, anti-virus problems, or just need assistance setting up and using, please email us, we are here to help!
